

Bachelor of Science in Management Information Systems in FOUR Academic Years (2017)

This is a breakdown of how a student, knowing he or she wishes to be a Management Information Systems major upon entering OU, could complete the General Education, Pre-Core, Business Core, and Business Major requirements within a four-year period of time. The plan assumes that a student takes one General Education course that also double counts to meet US Diversity. This plan is only an example and students should still regularly meet with an academic adviser.

Note: While all Business Administration majors follow the same General Education, Pre-Core, and Business Core requirements, Major requirements may be between four and eight classes depending on which of the eight possible majors in Business Administration is chosen.

*The below plan is based on a student placing into WRT 1050 and into MTH 1221. Students who place into different MTH and WRT courses will need to adjust this plan.
