AAMC Virtual Medical Education Event

Over the past few years, Competency-Based Medical Education (CBME) and Quality Improvement/Patient Safety (QI/PS) have received significant attention and investment from the medical education community. By attending this virtual event, you will learn about results of the latest pilots and the research and thinking about these important topics. Additionally, you will hear about the AAMC's latest initiatives in medical education. **Register now to attend an in-person screening of these webinars at Beaumont Royal Oak.**

Accepting Applications for Fall 2018 Programs

We are now accepting applications for the next [Clinical Teaching Program Cohort Group](#) using the Stanford Curriculum.

Additionally, we are also accepting applications for the upcoming [Fellowship in Medical Education program](#).

Please contact ceme@oakland.edu if you are interested in participating in either of these programs.

Wednesday, July 18th

NHMA/NPA Webinar - Heart Disease: Prevention and Access to Treatment for Minorities

4 to 5 p.m. | Elena Rios, MD, MSPH; Martha L. Daviglus, MD & Jovonni R. Spinner, MPH, CHES

This webinar—hosted by the National Hispanic Medical Association (NHMA) and the Office of Minority Health's National Partnership for Action to End Health Disparities (NPA)—will provide an overview of heart disease and its impact on the Hispanic community and will share findings from NHMA's Cardiovascular Disease and Hispanics Summit Series. The webinar also will describe the need for racial and ethnic diversity in clinical trials of interventions for heart disease to ensure that communities of color have treatments that work for them.

Thursday, July 19th

iGen Book Club: Intro and Chapter 1

12 to 1 p.m.

This interactive book club will focus on Jean M. Twenge's book, iGen, where she presents her research on the American youth generation who were born beginning in 1996; a generation which has never known a world without the internet. This series will engage participants through discussions covering each sessions assigned chapters and incorporating participants' own life experiences as youth in comparison with those of the iGeneration. The potential impact of these generational differences will be examined as well as the impact on future medical education.

Tuesday, July 24th

Crucial Conversations

2 to 3:30 p.m. | Christina Moore, M.A.

A conversation turns “crucial” when the stakes are high, emotions are strong, and opinions vary. Unfortunately, the higher the stakes are in conversations, the worse we tend to handle them. Join us for discussion of effective strategies for navigating the toughest dialogues in professional and personal situations as shared the book Crucial Conversations. Reading this book ahead of time is a bonus, but not required.

Wednesday, July 25th

Surviving an Active Assailant

2 to 3:30 p.m. | Chief Mark Gordon

This session will be offered at additional dates and times - see linked flyer for additional date information

Prepare for the unexpected with this interactive presentation by the Oakland University Police Department. Learn what you can do to keep yourself safe while on campus and learn how law enforcement agencies across the nation are responding to this growing trend. This candid presentation, combined with an informative video and a question and answer period, will give you the information you need to keep yourself safe if you find yourself face to face with a gunman.

OUIWB Clinical Faculty can register by contacting ceme@oakland.edu.

Friday, July 27th

Creating and Using Competency-based Assessments

9 to 10:30 a.m. | Cynthia Ledford, M.D.

Medical education has transformed dramatically in the past decade, informed by advances in learning sciences and competency-based medical education. As a result, those who lead our educational programs now require more advanced skills and understanding of how to put educational theory into practice. This session will cover how to connect learning outcomes with clinical skills and the importance of appropriate and applicable competency-based assessments.
