

Program Effectiveness Data

NOTE: This program has graduated 3 classes (2015, 2016 AND 2017). The data provided here is based on these 3 cohorts of students.

Credentialing examination pass rate is defined as the number of graduates who pass, on the first attempt, the credentialing examination administered by the American Registry of Radiologic Technologists (ARRT) compared to the number of graduates that take the examination within 6 months of program completion.

Exam pass rate: 2015: 13/13 = 100%

2016: 11/13 = 84.6%

2017: 14/14 = 100%

3 year average: 38/40 = 95%

Job placement rate is defined as the number of graduates employed in the radiologic sciences compared to the number of graduates actively seeking employment in the radiologic sciences. “Not actively seeking employment” includes graduates who fail to communicate employment status after multiple attempts, graduates unwilling to accept employment for relocation, salary, or scheduling reasons, graduates on active military duty or graduates continuing their education.

Job placement rate within 12 months of graduation – 2015: 13/13 = 100%

2016: 13/13 = 100%

2017: 14/14 = 100%

3 year average: 40/40 = 100%

Program completion rate is defined as the number of students who complete the program within 150% of the program length. It is calculated by dividing the number of students who completed the program within a cohort by the number who enrolled in the cohort initially and subsequently. Students leaving the program before the official drop date are not considered in this data.

Program completion rate: 2015: 13/14 = 93%

2016: 13/14 = 93%

2017: 14/16 = 87%

3 year average: 40/44 = 90.9%
