

Class Add

Students will not be required to obtain signatures to add open course sections the first week of a given semester. Therefore, SAIL (web) registration will continue to be available through the first week of the Fall and Winter semesters and the first three days of the first week of the Spring and Summer sessions.

For those sections that are closed, students will either need to obtain a signed add form or faculty/academic adviser can grant permission by using the Registration Permit Override form in Banner. The Registration Permit Override form allows permission to be granted for students to add into closed sections. Once approval is given, students can web register for the closed section.

Beginning with the second week of classes, SAIL will not be available to students adding into courses and signatures will be required to add into any section.
