of the
Oakland University Board of Trustees
August 13, 2018**

Present: Chair W. David Tull; Vice Chair Tonya Allen; and Trustees, Richard L. DeVore, Marianne Fey, Mark E. Schlusel, Robert Schostak, and Melissa Stolicker

Absent: Trustee Ronald E. Robinson

Also Present: President Ora Hirsch Pescovitz; Chief Operating Officer Scott G. Kunselman; Senior Vice President James P. Lentini; Vice Presidents John W. Beaghan, Rochelle A. Black, Glenn McIntosh, Michael J. Westfall, John O. Young, Vice President and Secretary to the Board of Trustees Victor A. Zambardi; and Student Liaison Margaret Merogi

A. Call to Order

Chair W. David Tull called the meeting to order at 2:02 p.m. in Banquet Room A of the Oakland Center.

B. Roll Call

Mr. Victor A. Zambardi, Vice President for Legal Affairs, General Counsel and Secretary to the Board of Trustees, conducted a roll call and all of the Board members were present, except Trustee Ronald E. Robinson.

C. President's Report

President Pescovitz began by welcoming Steve Waterfield, Oakland's new Athletics Director to the University. After completing her first year as President, it is now time to get down to the hard work of the University. Last year there was collective focus on the University's Mission, Vision and Strategic Plan of 2025, which added a fourth goal of "advancing diversity, equity, and inclusion."

To focus Oakland's energies collectively on the Strategic Plan's first goal of fostering student success, a President's Leadership Retreat was held in July. Cabinet Members, all of the Deans and selective department administrators attended the retreat. The attendees were given an assignment to read Daniel Pink's book "Drive," a book about what motivates people to come to work beyond money. The book focuses on the purpose at work, mastery of the assigned task, and a worker's autonomy. The discussion of the book led into the second day of the retreat, the focus of which was to develop a Strategic Enrollment Plan focusing on recruitment, retention and credit generation.

In order to achieve all four of the Strategic Plan's goals as an institution, a stable and a sustainable funding model is required and the current funding model is primarily driven by a student tuition.

Tuition accounts for 81% of Oakland's revenue with State funding providing approximately 18%. This is particularly challenging because Michigan is currently in a steep decline demographically with fewer college-aged students, which leads to lower enrollment for both first time in any college students and transfer students. A Strategic Enrollment Management plan was created to counter the downward trends through competitive strategies for attracting more first-year, transfer, graduate and adult learners, as well as a strategic plan to increase student retention and graduation rates as well and to find more opportunities to bring additional credits to OU through a variety of strategies. By the end of the retreat, she challenged the participants to determine who is going to do what by when. She wanted specific tactics and strategies that people would be working on and she expects everyone to have a specific and identifiable role.

President Pescovitz presented a summary of demographic trends of high school graduate projections and historical OU enrollment. She is hoping to get better than 20,000 students by 2022 with the aggressive plan she is expecting the assigned teams to produce. It is Oakland's aspiration and goal to make Oakland University the "University of Choice" for our students, faculty, staff and supporters and she states this is an achievable goal.

Provost Lentini continued noting that due to the Admissions team working incredibly hard, there is a chance that this year's freshmen class will be the largest ever, but there is more work to be done. The concept of strategic enrollment management (SEM) is that you can fulfill an institution's mission and students' goals by involving the whole campus, not just a few departments. The teams that are being assigned will be working on specific numbers of students that budgets can be attached to. Provost Lentini noted that Oakland has capacity to keep improving retention despite current record retention and graduation rates. The Provost's office and others on campus are looking at the allocation of limited resources to determine if they allocating them to the right places. Communications and Marketing is an integral part in determining how Oakland recruits students in the most effective way. They are also looking at any departmental enrollment declines to determine the cause.

Traditionally, the four key areas of enrollment are Admissions, Financial Aid, Recruitment/Marketing, and Orientation, but SEM goes beyond those areas including looking into the classroom experience, looking at DFWI metrics and redesigning gateway courses to ensure success. Although freshmen enrollment is up, a challenge is that transfers are down but have put strategies in place, including articulation agreements with OCC and MCC to increase the transfer numbers. Financial Aid Optimization is being used to determine how financial aid dollars are spent and whether allocating financial aid differently would increase enrollment. Search Engine Optimization, setting retention goals, revamping course offerings, and closing the gap between underrepresented minority students and the average student population in terms of retention and graduation rates are all strategies and initiatives being utilized to address these issues as are new credit generation initiatives, such as fast track programs at Macomb, professional and continuing education programs.

E. New Items for Consideration/Action

Oakland Center Expansion Budget Adjustment

Mr. Glenn McIntosh, Vice President for Student Affairs and Chief Diversity Officer, presented the Oakland Center Expansion Budget Adjustment Board of Trustees recommendation as set forth in the agenda item.

RESOLVED, that the total cost for the Oakland Center Expansion project be increased by \$691,974, funded by Chartwells and the Michigan State University Federal Credit Union, to a not-to-exceed budget of \$47,326,974 inclusive of all design, construction, furnishings, equipment, and project management; and, be it further

RESOLVED, that the Board of Trustees authorizes the President and the Chief Operating Officer, and their respective designees, to perform all acts and deeds and to execute and deliver all contracts, instruments and documents required by this resolution that are necessary, expedient and proper in connection with the Oakland Center Expansion and the ongoing administration of the project; and, be it further

RESOLVED, that said contracts, instruments and documents shall be reviewed by and be in a form acceptable to the Vice President for Legal Affairs and General Counsel prior to execution, and be in compliance with the law and with University policies and regulations and conform to the legal standards of the Vice President for Legal Affairs and General Counsel.

Mr. McIntosh indicated that the Oakland Credit Union approached and requested some enhancements to their area of the Oakland Center, as well as adding some ATM kiosks in the building. In addition, Chartwells requested some enhancements to their area of the Oakland Center and, as a result, the cost of the project went up about \$691,000 from the amount originally authorized by the Board. Chartwells would pay Oakland \$558,000 for their enhancements and the Credit Union would pay \$133,000 to pay for the increase in budget cost of the project so there would be no increase in the amount Oakland is paying for the project.

After discussion, Trustee Allen, seconded by Trustee DeVore, moved approval of the recommendation, and the motion was unanimously approved by those present.

F. Dean's Report – Kevin A. Ball, Dean School of Health Sciences

Dean Ball began noting that the slogan for the School of Health Sciences is "In Purpose for Health." The slogan represents the concept that the School is ultimately committed to one word, health. In recent years, one in three graduates self-reported that they had gone into a health medical career from the various schools at Oakland. There are many health-oriented students in the College of Arts and Sciences, the School of Nursing, and even the schools of Business and Engineering. The School's mission statement is, "Built upon the foundations of the natural and behavioral sciences, the School of Health Sciences transforms students into leaders, connects theory to best practices, and impacts the needs of communities." The behavioral sciences include sociology, psychology, epidemiology in the context of health and the natural sciences include physics, biology, chemistry and, communications and mathematics. Health careers are developed from a foundational knowledge that is broad and the School depends on the work of the College of Arts and Sciences in helping in those preparations. Students find their way into their health care careers best when they identify the areas in which they have expertise or interests. For example, students who find themselves interested in the behavioral science, such as sociology and psychology might end with a career in Interdisciplinary Health Sciences.

The School had a 99.1% placement last year of which 56% were successfully placed into graduate and continuing professional education programs which presents a great opportunity to increase the possibilities for graduate education at the School, which is something they are working on. The School has six different rigorous accreditations. Although they are middle sized by credit hours, they have the smallest budget and he noted that first-year retention was at 85% last year.

In the Human Movement Science division, they have been strong in Physical Therapy for a long time and they have 45 years of Master of Science leadership in Exercise Science. They have never had a major of Bachelor's degree in Exercise Science but hope to obtain Board approval for the major to begin in 2019. In the Clinical and Diagnostics Sciences areas, they have 40 years of expertise in Bachelor's entry into certified health careers. The School has comprehensive expertise in public health, wellness, and safety and are very much engaged in community experiential learning. The cycle students work on is policy, assessment and action. In Interdisciplinary Health Sciences, they are committed to community service and leadership, in diverse, inclusive, and multidisciplinary areas. The field that they are growing in dramatically is nutrition and they are going to develop a major, which they hope to get approved and launch in 2019, which will be followed by a Registered Dietetics program the following year.

The School created a new leadership program called "ECLIPSE," where students engage in a pursuit across the time that they are students at Oakland to create change. They work with industry partners for clinical experiences and community engagement and when they graduate, in addition to a degree, they will have their ePortfolio of leadership experiences. He also noted the success of the Board of Advocacy and Resource Development, which includes 17 members, who provide the School with great connections and great opportunities.

G. Other Items for Consideration/Action that May Come Before the Board

There were no other items for consideration/action presented to the Board.
