Serious interest in the influence of big data is fueling a new career for MICHELLE RHEN. With a graduate certificate in business analytics, Michelle is building a powerful platform to advance to the next level.

STRENGTHEN

GRADUATE CERTIFICATE IN BUSINESS ANALYTICS

Enhance your expertise with the skills and knowledge to leverage the power of data to improve business processes with a Graduate Certificate in Business Analytics. From automotive and financial services to marketing, human resources and education, career opportunities abound for professionals who know how to harness and interpret data.

AUDIENCE
- Professionals from any industry seeking knowledge in business analytics
- Bachelor’s degree in any field

IN DEMAND SKILLS
- Employment in business intelligence and related fields is projected to grow 31% by 2028, according to the U.S. Bureau of Labor Statistics.

BENEFITS
- Enhance your ability to utilize information and apply data analytics to make strategic decisions
- Learn to analyze data to make informed, data-driven decisions that lead to in-depth understanding of customers, markets and operations
- Discover how to apply data analytics to meet business objectives
- Earn credits that can be applied towards Oakland’s Master of Science in Information Technology Management or Master of Science in Business Analytics
PROGRAM OVERVIEW
Students in the program will explore a range of quantitative and computational techniques which have wide use in today’s data-driven business world. Students will study statistical analysis, data visualization, data mining, predictive analytics, data preparation and cleaning, data warehousing and mathematical modeling.

Most courses include a significant project component, sponsored by a partner organization or the employer of the student. The sponsored projects provide students with hands-on, real-world application of the program material.
