Winter 2024 Notes and Special Topic Course Descriptions:

Note 1:

This course will fulfill the Information Technology MBA elective requirement.

Note 2:

This course will fulfill the MBA International elective requirement.

Note 3:

These courses are designed for the MAcc (Masters of Accounting) student. MBA students with an accounting background may take these courses with permission from Donna Free, Faculty Coordinator, Master of Accounting. The 5000 level courses will fulfill the 6000 level MBA elective requirements. For MBA students, ACC 6300 will fulfill an open elective; it will not fulfill any 6000 level accounting requirements. If you are not a MAcc student and wish to complete any of these courses contact Donna Free at free@oakland.edu for permission.

Note 4:

All students must complete a capstone course - ACC 6995 for MAcc; MGT 5350 [or MGT 5360] for MBA; and MIS 6940 for MSITM. The capstone course should be taken near the end of your program. Advisor permission is required to register for these courses. To register for MGT 5350 or MIS 6940 call Graduate Business Programs at (248) 370-3287; to register for ACC 6995 email Donna Free at free@oakland.edu.

Note 5:

MGT/MKT 6900 - ST: Sustainability Mgt & Mkt (13326/13325): This course addresses topics related to sustainability and business. The course looks at the concept of sustainability from both environmental and managerial perspectives and introduces systems theory as a necessary tool for understanding sustainability. It incorporates managing for change and uncertainty.

Note 6:

MIS 6900 -ST: Business Application Tech (15122): As the Web becomes a standard platform for enterprise computing and e-commerce most of the business applications developed nowadays are web-based. Web application development is steadily becoming more complex. There is a great need for separating the content from the page design so that content could be modified without changing the layout. Server-side technologies (such as Servlets and JSP) facilitate web applications to be broken down into separate components, which allow different groups to work on different aspects of the application. For example, one group could focus on design of the layout group may concentrate on just the content. This course focuses on the fundamentals of web applications as well as the programming technologies and techniques to build them.

Note 7:

MIS 6900 - ST: Digital Innovation (15125): This course is focused on the theoretical and practical approaches to executing digital innovation. Students will be introduced to the fundamentals of developing innovative strategies for business. Discussions will include innovation strategy, idea generation, prototyping, collaboration, innovation networks, venture capital, social value, and building innovation.

Note 8:

MIS 6900 - ST: Social Network Analysis (15123): The course focuses on a broad range of theoretical concepts and methodological tools and techniques used in Social Network Analysis (SNA). The explosive growth in the use of social media and collaboration tools in organizations continues to generate different types of networks. This course will provide students with necessary skills to understand network concepts and analyze networks using SNA tools and techniques for generating insights that organizations could use.

Note 8:

MKT 6900 - ST: Data Analytic MKT/Bus Strat (13003): In the age of big data, the effective use of large sized datasets allows firms to explore business opportunities and enhance strategic competitiveness. One of the most valuable competencies for students is to combine their strategic thinking with big data analysis and effectively communicate their findings. To prepare students for the age, this course will provide opportunities to 1) prepare themselves for skill sets and mind sets required in the age of big data, 2) apply statistical and strategic thinking to decision making, and 3) effectively communicate findings from the analysis.

OTHER IMPORTANT INFORMATION:

A graduate student, with the approval of departmental adviser, may use a maximum of 12 credits of 4000-4999 courses taken at Oakland University toward a graduate degree (taken from Graduate catalog).

Waitlisting Through Sail

The same registration requirements apply for waitlisting (e.g. prerequisites, restrictions etc.)

After priority registration waitlist is first-come, first-served

Restrictions allowed for waitlisting (not registration)

Duplicate section

Time conflict

Students are automatically notified when a seat becomes available through their OU email by waitlist@oakland.edu

Students have 24 hours to register for a waitlisted course

Student may choose to do nothing, and then the next student on the waitlist will be notified after 24 hours expires

If a student changes their mind after their 24 hours expires, they could add themselves back to bottom of waitlist

Waitlisting available through first week of late registration

Second week of late registration waitlisting will not be available

GRADUATION

When you are near completing your degree requirements, you must complete the Application for Degree form. This application is completed online in SAIL. For more information see Apply for Graduation website: oakland.edu/graduate
