I. Mission Statement

Oakland University is a preeminent metropolitan university that is recognized as a studentcentered, doctoral research institution with a global perspective. We engage students in distinctive educational experiences that connect to the unique and diverse opportunities within and beyond our region.

Through faculty-driven and student-engaged research, scholarship, and creative activity, Oakland University advances knowledge and art in a diverse and inclusive environment.

Oakland University is an active community partner providing thriving civic, cultural, and recreational opportunities and valuable public service.

Strategic Plan

<u>Goal #1:</u> Foster student success through a robust teaching and learning environment and comprehensive student services.

<u>Goal #2:</u> Be recognized as a strong research and scholarly environment focused on creative endeavors and on the discovery, dissemination and utilization of knowledge.

<u>Goal #3:</u> Become a leader in serving the needs and aspirations of our communities and region through expanded community relationships, institutional reputation and visibility, and engagement.

<u>Affirmation Statement</u>: The University's three goals developed during several months of planning work are a concise expression of our institutional aspirations. Thus, it is important to recognize that student success is meant to encompass the full range of student experiences and opportunities while at the university. We also recognize that an intrinsic part of achieving these goals must include ensuring the university's excellence and the attainment of its mission through effective institutional processes, shared decision-making and transparent best practices.

II. Instructional Programming

Oakland University (Oakland, University or OU) is a doctoral/research University located in Rochester, Michigan, within Oakland County. Through unique and distinctive academic experiences, Oakland is preparing students to make meaningful and substantial contributions to the workplace, academia and the community.

An Engaged University

Oakland University is the only comprehensive, doctoral-level university located in Oakland County, Michigan. Recognized as one of the country's 90 doctoral research universities by the Carnegie Foundation for the Advancement of Teaching, the University offers students opportunities to work directly on research with expert faculty.

Through a multitude of partnerships with hospitals, Fortune 500 companies, individuals, cities, government agencies and educational institutions, Oakland helps communities solve problems and build thriving, sustainable businesses. These associations reward students with internship and co-op opportunities and provide University researchers access to the latest technology tools. Oakland's leadership with these partnerships also significantly impacts economic development and commercialization opportunities.

Oakland offers a strong undergraduate program founded in the liberal arts and basic sciences and is widely recognized for excellence in biomedical sciences and other health-related programs. It has a School of Nursing, School of Health Sciences, renowned Eye Research Institute, and highly regarded programs in bioengineering, informatics and nanotechnology, health and environmental chemistry, medical physics and biological communication.

Oakland's other professional schools (Business Administration, Education and Human Services, Engineering and Computer Science), as well as the College of Arts and Sciences, have been recognized nationally for various accomplishments.

Oakland, in partnership with Beaumont Health System, opened the first M.D.-granting medical school in Oakland County with an inaugural class of 50 students in August 2011. The school graduated its first class of 47 doctors in May 2015 and has enrollment of 400 in fall 2015. The first new medical school started in Michigan in a generation, the Oakland University William Beaumont School of Medicine (OUWB) is expected to help boost the local and regional economies by generating new jobs and attracting medical, business and academic leaders from around the nation. OUWB was designed to transform medical education by emphasizing holistic physician development – a "liberal arts medical education" that is grounded in evidence-based medical science.

A Leading University

Oakland University is a preeminent metropolitan university that is recognized as a student-centered, doctoral research institution with a global perspective. It engages students in distinctive educational experiences that connect to the unique and diverse opportunities within our region and beyond.

Through faculty-driven and student-engaged research, scholarship and creative activity, Oakland University advances knowledge and art in a diverse and inclusive environment. Oakland is also an active community partner, providing thriving civic, cultural, and recreational opportunities and valuable public service.

In addition to equipping graduates with a broad base of knowledge and top-notch intellectual and experiential opportunities, Oakland is equally dedicated to the development of students in all aspects of their lives. Through a carefully thought-out collection of campus life

experiences, the University gives students opportunities to conduct research and participate in internship and co-op experiences.

A Growing University

Oakland is among the fastest growing public universities in the state with:

- highest 5 year and 10 year growth rates in the state;
- 21 years of record enrollment levels;
- · increased representation of minority students;
- an increase in graduate students responding to new program development, greater outreach activities and advanced technology-assisted education delivery.

Over the last 15 years, the University has seen a 39 percent increase in enrollment. It has added more than 65 new degree programs since 1995 to strengthen educational offerings.

Oakland has continued to keep pace with growth by providing new and advanced academic, research and support facilities. Recent capital projects have included:

- the Human Health Building (home of the School of Health Science and School of Nursing)
- the Engineering Center (home of the School of Engineering and Computer Science)
- a second parking structure with 1,245 spaces
- the 504-bed Oak View residence hall, which includes a new home for the Honors College
- upgrades to the Recreation and Athletics Outdoor Complex, creating a track and field stadium, tennis courts, and synthetic turf soccer fields
- an Athletic Dome funded through a public-private partnership to provide an indoor athletic practice facility
- completion of the 151-foot-tall, 49-bell Elliott Tower (100 percent funded by generous donors, Hugh and Nancy Elliott)
- a new headquarters building for Facilities Management

The Campus Master Plan accounts for expected growth and includes:

- a third parking structure
- housing facilities to expand the number of beds on campus
- the identification of potential building sites
- a research and development park
- a new humanities facility

With the arrival of a new President in 2014 and the completion of a new Strategic Plan, the timing was right to revisit the Campus Master Plan. A master planning consultant has been retained to assist in a campus-wide effort to update the Campus Master Plan, with an expected completion in the summer of 2016.

Several upgrades, renovations and technological improvements to various classrooms, laboratories and common areas were recently completed. Primary laboratories to receive extensive renovation were in chemistry, biology, physics, and art and art history – all programs that have experienced large increases in student enrollment or are key components of Oakland's biomedical and health care academic offerings.

Applied Research and Economic Development

Oakland offers knowledge, resources and programs that help companies grow. With its research labs, facilities, faculty and students, the University assists companies in transforming ideas into new business developments, turning dreams into reality and giving vitality to vision. At the OU INC and Macomb-OU business incubators, the University is committed to assisting startups and spin-offs to locate and secure technology development, business planning and capital acquisition, as well as providing opportunities for the licensing of Oakland University's intellectual property. To foster emerging discoveries, the University features several noted research centers, including the:

- Automotive Tribology Center (ATC)
- Center for Applied Research in Musical Understanding (CARMU)
- Center for Autism including (OUCARES)
- Center for Biomedical Research (CBR)
- Center for Integrated Business Research and Education (CIBRE)
- Center for Robotics and Advanced Automation (CRAA)
- Center for Social and Behavioral Research (CSBR)
- Clean Energy Research Center (CERC)
- Eye Research Institute (ERI)
- Fastening and Joining Research Institute (FAJRI)
- Galileo Institute for Teacher Leadership
- Ken Morris Center for the Study of Labor and Work
- Prevention Research Center (PRC)
- Institute for Stem Cell and Regenerative Medicine (ISCRM)

OU SmartZone Business Incubators: OU INC is a SmartZone Business

Incubator/Accelerator in collaboration with the City of Rochester Hills and Michigan Economic Development Corporation, and partners with Oakland County and Automation Alley. OU INC provides entrepreneurial resources and strategic business solutions for developing business ventures and accelerates ideas to market. It fosters a healthy environment for the growth of new startup companies and provides support for existing entities through its facility and resources. The OU INC facility provides business resources, including those offered by the Clean Energy Research Center and the Integrated Resource Center, as well as access to the expertise and skills of staff, faculty, students and corporate partners.

The Macomb-OU INCubator provides entrepreneurial resources, business solutions, and access to student interns and proactive support to businesses at every stage in an effort to help startups on their path to success. The goal of the incubator is to create jobs and

advance business development by identifying sources of necessary financing for growth; helping develop business strategy; consulting; and providing access to appropriate rental space, shared business services, equipment and technology support services in the areas of defense, homeland security, advanced manufacturing and technology. It is a part of the Velocity Collaboration Center, a joint venture between Oakland University, Macomb County and the City of Sterling Heights.

Fastening and Joining Research Institute (FAJRI): A collaboration between Oakland University, the U.S. Congress, the U.S. Army Tank Automotive Research and Engineering Center (TARDEC), the National Science Foundation and Fiat Chrysler Automobiles, FAJRI is an externally funded, academic, nonprofit research facility that is solely dedicated to exploring fundamental and applied research to develop and disseminate new technology for the fastening and joining of materials such as metals, composites, polymers and biomaterials.

Center for Robotics and Advanced Automation: Funded by the National Science Foundation, the Big Three automotive companies and the Department of Defense, the center works on smart control technology with industrial and defense applications, intelligent robotics, homeland security technology, suspension systems, digital shearography, and global satellite communication technology and systems.

Eye Research Institute (ERI): This unique center of ophthalmic research collaborates with the department of ophthalmology at Beaumont Health System on research and provides a joint ophthalmology residency and fellowship program. Since 1968, ERI scientists have received over \$50 million in support from private and federal health agencies.

Center for Biomedical Research: This center provides core facilities and pilot funding for the applied biomedical research efforts of Oakland University's life scientists. Key research includes eye diseases, chemical toxicology, medical physics and biological communication.

Partnerships

Oakland has leveraged its unique Auburn Hills/Rochester Hills/Rochester location in the heart of Michigan's technology and automotive corridor by forging strategic partnerships with hospitals, Fortune 500 and international companies, individuals, cities, government agencies and educational institutions located as near as Southeast Michigan and as far as other countries. The benefits of these associations are far-reaching: students are rewarded with internship and co-op opportunities, University researchers have access to the latest technology tools, and the region benefits through new business opportunities and a stronger economy.

Eugene Applebaum College of Pharmacy and Health Sciences: An alliance between Oakland University's School of Health Sciences and Wayne State University (WSU) provides Oakland's undergraduates a unique opportunity to earn a doctorate in pharmacy. Students can earn their bachelor's degree at OU taking pre-pharmacy courses. During their senior year at OU, students take pharmacy classes at WSU. Their senior year at OU is also their first

year at WSU, giving students the opportunity to complete a doctoral program in seven years instead of eight, saving time and money.

Crittenton Hospital Medical Center: Crittenton Hospital Medical Center has funded a \$2 million endowed professorship in Oakland University's School of Nursing that is changing the clinical education and training of nursing students. The nursing professorship conducts patient-focused research on the science and best practices of nursing, an area that has not received much attention to date. Students in the program conduct all of their clinical rotations at Crittenton Hospital Medical Center using the relationship-based care (RBC) model. RBC moves from an individual expert dynamic to one of engaging patients, identifying options, relaying experiences and empowering patients and their families to make the best treatment decisions.

OU Anton/Frankel Center: Oakland University expanded its reach in Macomb County with the opening of the Anton/Frankel Center (AFC) in fall 2011. With 25,422 square feet of space to house classrooms, offices for advising, student support services, faculty and staff, the AFC signals OU's continued commitment to bringing exceptional academic opportunities to the people of Macomb County. Programs offered at the AFC include bachelor's degrees in criminal justice, psychology, marketing and social work; and master's degrees in public administration and business administration.

The University of Botswana: Oakland University's Department of Counseling in the School of Education and Human Services, in partnership with the University of Botswana (UB), provides student and faculty exchanges, video conferences, and partnerships in research, scholarship, teaching and service.

Israel's Max Stern Academic College: Oakland University offers global experiences for students and faculty through a myriad of overseas programs, including a partnership with Max Stern Academic College in Emek Yezreel, Israel. Students and faculty on both campuses will experience different cultures through research opportunities, academic coursework and student life.

The Pawley Learning Institute: Established through a gift from Dennis Pawley, an OU alumnus and former chair of the OU Board of Trustees, the Pawley Learning Institute provides instruction and research on concepts and training that improve organizational practice.

Instructional Technology

Access to user friendly instructional technology resources in the classroom are a standard expectation of Oakland's faculty and students. All general purpose classrooms and a growing number of conference rooms and labs are equipped with enhanced instructional technology resources.

University classrooms are equipped with the following:

- Multimedia workstation containing: a PC computer hardwired to campus network; a
 digital document camera; an electronic whiteboard; a DVD player; an interface to
 plug in a user provided laptop computer or mobile device, an interface to plug in an
 accessory analog audio/video device; sound system; and an electronic media
 control system for the room
- Ceiling mounted video/data projection system connected to the multimedia workstation
- Wireless network access
- A lecture capture system (Panopto) is also available to record classroom instruction and post recordings online for student review
- Room microphones and video cameras are also either currently installed or available on an as-needed basis

Oakland continues to expand its course offerings via distance education. The three modes of delivery include live two-way interactive video to student groups, synchronous web-based instruction to individual students and asynchronous web-based online learning.

The Internet is the current transmission vehicle for the University's live two-way compressed video course offerings. The ongoing development and interest in online learning courses and programs has reduced the need to utilize the more expensive live interactive video distance learning model and thus there is less of a need to maintain high cost video conferencing appliance based systems and resources.

A software based video collaboration tool called WebEx is also available for the University community to conduct business at a distance. These types of technologies save time and money by providing a communications tool that allows for the sharing of voice, video and content between two or more computers or mobile devices. The growth in web based learning models will continue to expand in the foreseeable future.

Oakland University supports a web-based Course Management System (CMS) utilizing Moodle. Moodle can be used as a full "web based" solution where no face-to-face teaching is required or as a "web supplemented" course resource that enhances the standard face-to-face classroom contact between faculty and students. Moodle offers online activities such as discussion boards, chat, quizzes, grade book, file storage and display, RSS feeds, wikis, journals, workshops, automated lessons. Moodle will also be the portal to access lecture capture recordings. Another separate instance of Moodle is supported via e-Portfolio. It includes digital space for student career Portfolios. A third instance of Moodle is called e-Space that contains department assessment activities, research, academic committees, advising, and other miscellaneous academic activities. Another teaching tool being utilized is Second Life, an experimental island where several faculty meet their classes.

During the Winter 2015 term, Oakland offered 259 course sections that are fully online and approximately 67% of all course sections are providing some level of web supplemented activity. Oakland also offers thirteen online degree and certificate programs. Scantron machines, i-Clicker, and other software are supported centrally for grading exams and processing course evaluations.

Technological Enhancements

Oakland University is dedicated to enhancing education through the use of contemporary and emerging technologies and continues to commit significant resources to technological enhancements, including:

- Complete administrative software suite.
- On-line registration.
- Extensive wired and wireless network to all classroom buildings and surroundings.
- Elliott Hall of Business and Information Technology, a 74,000-square foot, technologyrich facility.
- The Pawley Hall of Education & Human Services Building with 24 enhanced technology classrooms and an all-digital video recording, playback and archive system in the School's Counseling Center.
- Interactive television and video conferencing capability to supplement instruction and administrative program activity.
- On-line web-based course offerings to students utilizing Moodle.
- Other teaching and learning software, such as Panopto, CourseWeb, Scantron, Turnitin, Second Life, Camtasia, I-clicker, and Visual Communicator.
- An Information Commons in Kresge Library with a significant number of computer work stations for the patrons.
- A remodel of O'Dowd Hall was completed to become the initial home of the new OUWB, including the addition of many new technology enhancements.
- An off-site School of Nursing instructional center in the Detroit based Focus Hope facility.
- Renovation of the two-story Anton/Frankel Center in Mount Clemens provides Oakland with a third Macomb County location with an additional 25,422 square feet of space. The new center will provide classrooms as well as offices for advising, student support services, faculty and staff.
- Major classroom renovation projects that included significant technology enhancement in older campus buildings continue to be a priority objective.
- A Human Health Building (HHB) provides the University community with an all-digital classroom technology systems within all instructional spaces, a state-of-the-art Nursing SIM lab, and many technology enhancements within specialty laboratories. The HHB has been recognized at a LEED Platinum building, the first Platinum building on a University campus in the State of Michigan.
- A new Engineering Center building opened in the fall of 2014 with state of the art instructional facilities and resources.
- Nine new instructional classrooms were created within existing University space that was repurposed and remodeled to include the most current instructional technology resources.
- Oakland is a partner with the City of Auburn Hills in the collaboration of a University Center which opened in January of 2014.
- The University is also partnering with the Pontiac public school system and is developing a collaboration center and classroom in downtown Pontiac.

Cultural and Performing Arts

Oakland's contribution to the arts has moved beyond local boundaries to secure a place of prominence in the region. Historically, OU has had a strong performing arts program with record-high enrollment numbers.

The Department of Music, Theatre and Dance offers more than 140 student and faculty performances throughout the school year. Guests enjoy everything from musicals and intimate recitals to experimental plays and innovative dance performances. OU has earned a reputation for taking artistic risks, developing gifted artists, nurturing arts partnerships and achieving new heights of quality and professionalism.

Meadow Brook Hall is the sixth largest historic house museum in the United States and is renowned for its superb craftsmanship, architectural detailing and grand scale. Built between 1926 and 1929 as the residence of Matilda Dodge Wilson (widow of auto pioneer John Dodge) and her second husband, lumber broker Alfred G. Wilson, the 110-room, 88,000-square-foot, Tudor-revival style mansion is complete with vast collections of original art and furnishings. In 2012, the U.S. Department of the Interior designated the hall a National Historic Landmark, the highest recognition for historic properties in the United States.

For more than 40 years, the Oakland University Art Gallery (OUAG), housed in the Department of Art and Art History, has delivered diverse, museum-quality art to Metro Detroit audiences. From September to May, the OUAG presents up to six different exhibitions – from cutting-edge contemporary art to projects exploring historical and global themes. The gallery also offers lectures, performances, tours, special events and more. Nearly 15,000 visit OUAG each year to experience art and cultural programs.

OU's outdoor summer amphitheater, Meadow Brook Music Festival, hosts today's top concerts including rock, alternative, adult contemporary, pop, country, and rhythm and blues; a wine and food festival; stand-up comedians; and family entertainment.

Community Outreach

In the more than 10 years since Oakland University initiated a formal partnership with the City of Rochester through the Rochester Downtown Development Authority (DDA), much has been accomplished with new initiatives added over time.

The partnership presents many opportunities for the OU community to benefit from joint educational and cultural programming. Areas of emphasis for students, faculty and alumni have included employment, internships, research and development projects, business development assistance, community service projects, promotions and business discounts, and opportunities to showcase the arts, theatre and music to complement classroom work.

The University annually hosts the Rochester Area Chamber of Commerce's Regional Outlook Luncheon and also maintains a support partnership with the Rochester Older Person's Commission. Students, alumni, faculty and staff enjoy discounts at dozens of participating

stores and restaurants through the OU GO card. The University also partners with the Rochester Regional Chamber of Commerce for joint programming and assistance. Oakland proudly partners with its other neighboring communities including Auburn Hills, Pontiac and Rochester Hills.

OU and the City of Pontiac have a long history together through programs such as GEAR UP (Gaining Early Awareness and Readiness for Undergraduate Programs), which helps students in the Pontiac as well as Oak Park school districts; Project Upward Bound, which helps 120 students each year finish high school and develop the social and cultural skills needed to realize their dreams and succeed in college and society; and through the Wade H. McCree Jr. Incentive Scholarship program, which assures that students who meet specific criteria will be awarded a full-tuition scholarship to Oakland when they graduate from high school. Recently, Oakland initiated a laboratory school initiative that places University faculty and education students in Pontiac schools to help institute and maintain instruction best practices in the classroom. The initiative is modeled after a highly successful model implemented in a neighboring Auburn Hills school.

Oakland University is involved in various community service efforts in Macomb County, including the Let's Move Festival of the Races in downtown Mount Clemens and emergency preparedness education programs. In addition, Oakland University students and staff including the OU Dance team, Cheer team and the Grizz, participated in the annual Macomb County Santa Parade last year.

In 2014, members of the Oakland University community opened their hearts and their wallets, making generous gifts to the All-University Fund Drive. A total of 786 faculty, staff and retirees contributed \$\$388,814. With matching funds included, this amount rose to more than \$560,000.

Academic and Student Life Enhancements

All students should have the benefit of academic support services, especially mentoring and small learning communities, aimed at helping them make the necessary academic and social adjustments to achieve collegiate success.

OU's First Year Advising Center connects new students with University advisers, peer mentors, graduate assistants, faculty and various support services on campus to provide a more effective student experience, especially during the critical first year.

The Oakland University Trustee Academic Success (OUTAS) scholarship program is a national model for retaining and graduating a diverse group of high-achieving university students. OUTAS was established to counter the declining rates of minority retention, graduation and student performance.

The Writing Center in Kresge Library, established through a leadership gift from OU Professor Emeritus of English Joan Rosen, assists hundreds of students each year. The

Writing Center provides assistance to students to develop and incorporate effective writing and communication skills in all subject areas.

Oakland's Honors College offers highly motivated students seeking a rich, valuable and challenging undergraduate education an intimate, intellectually friendly and challenging atmosphere. Small classes average 10 to 20 students and allow for more interaction between the professor and students. The program offers a specially designed core of general education courses in art, literature, western civilization, social science, global perspectives, mathematics, logic, computer science, natural science and technology.

OU has more than 250 student organizations that encourage student involvement and social opportunities.

The Recreation and Athletics Center hosts a number of activities throughout the year in which students may get involved, including intramural and club sports, group exercise classes and wellness-related programs. This multi-purpose facility draws more than 25,000 visits per month for recreational and sports programs.

New outdoor recreation and athletics facilities accommodate NCAA Division I athletic events including tennis and track and field meets, club and intramural sports competitions, and a variety of fitness and recreational activities welcoming university students, faculty, staff and community visitors.

OAKLAND UNIVERSITY UNDERGRADUATE DEGREE PROGRAMS

College of Arts and Sciences (100)

Bachelor of Arts - CASBA (58)

- 2810 Anthropology

Future Staffing Needs

Oakland University currently employs 4,509 full and part-time faculty and staff and 4,566 student employees. In addition, there are over 100 employees of contract service providers for food service, bookstore, and custodial services. Faculty and staff will grow with increased enrollment.

Average Class Size

Average class size for undergraduate instruction in fall 2014 was 31.85 students. Graduate class size in fall 2014 was 15.40 and PhD classes averaged 15.91 students. It is important to the institutional character that the size of classes remains small. However, larger classes have been a cost-effective way to absorb growth.

IV. Facility Assessment

Utilization Rates

Oakland University has the lowest building square footage per student (figure 6) of any of the 15 public universities. A comparison of its enrollment, programmatic mix, doctoral programs and the relatively large number of engineering and science programs suggests that the University's space should be closer to the overall average space of the 15 publics. Program by program comparisons to national norms for disciplines indicates that all programs fall short in space.

Classroom utilization is high, especially in the evenings. Oakland's enrollment includes a large number of non-traditional students. Demand for evening classes exceeds available facilities. A large number of evening classes are offered at area high schools.

Mandated Standards

Mandated standards for animal research are met.

Functionality

The limited amount of specialized program space affects overall space functionality. This is particularly evident in the most impacted areas of Nursing, Health Sciences, and the Performing Arts. Recent facility additions for the sciences, nursing, business and education provide good space for programmatic needs. Most academic programs on the Oakland University campus are offered in the following buildings:

- North Foundation Hall Completed in 1959, and is primarily a student services building, but also includes two classrooms. The building is receiving a general facelift and significant improvements to the air distribution system.
- South Foundation Hall Completed in 1959, this building is primarily a classroom building. The University has been adding technology to the classrooms over the past several years. This building is used by nearly all academic disciplines.

- Hannah Hall of Science Completed in 1961, houses science, health science, and engineering laboratories as well as classrooms and offices. Air conditioning was added as part of a major energy project undertaken several years ago. Portions of the building were renovated to accommodate health sciences as part of the State funded Science and Engineering Building.
- Kresge Library Completed in 1961 with additions in 1989. This is the central library for the institution.
- Wilson Hall Completed in 1967, houses the departments of Art and Art History, and Communications and Journalism. It also houses Meadow Brook Theatre and administrative offices.
- Dodge Hall of Engineering Completed in 1969, houses engineering and biology laboratories, offices, and classrooms. It also provides space for the Eye Research Institute and the administrative/academic computing center. The School of Engineering and Computer Science has a significant space deficit compared to national standards. This deficit will be significantly reduced by the construction of the new Engineering Center.
- Varner Hall Completed in 1970, houses the departments of Music, Theatre and Dance (MTD), History, Political Science, and Sociology/Anthropology. The facilities for MTD are inadequate to meet the needs of their growing programs.
- O'Dowd Hall Completed in 1982, this building houses the School of Nursing, the Graduate Office, the Registrar, the Departments of English, Writing and Rhetoric, Modern Languages and Literatures, Linguistics, Philosophy, and a number of general purpose classrooms. O'Dowd Hall is the home of the School of Medicine. The building continues to suffer from leaks along the curtain wall that have been a problem for a number of years. The curtain wall is being replaced in 2012-13.
- Elliott Hall Completed in 2000, houses the School of Business Administration and Information Technology.
- Pawley Hall Completed in 2002, houses the School of Education and Human Services, as well as the Lowry Child Development Center.
- Human Health Building Completed in Fall, 2012, this 172,825 square foot building
 houses the School of Health Sciences and the School of Nursing. Collectively, this
 new enterprise is part of Oakland University's vision of better preparing today's
 health care students by creating an innovative partnership in one structure. With this
 new building, growth in undergraduate and graduate enrollment can be significantly
 increased in response to vital shortages in nursing and heavy demand for health
 science professionals.
- Engineering Center (EC) Completed in Fall, 2014, this building is designed to
 provide high quality twenty first century instructional and research facilities for all
 engineering and computer science programs that are vital to the revival of the

economy of Southeast Michigan as well as the State of Michigan in general. This includes supporting the global competitiveness of the US alternative energy, health care and bio-medical, automotive, defense, and other high-tech industries. The EC added 128,000 square feet for the School of Engineering and Computer Science (SECS), as well as 13,500 square feet of assignable general purpose classroom space to support the growth of the overall student population.

Although academic programs are offered in other facilities and there are a number of other service buildings and auxiliary buildings, the above are the major academic facilities. The average age of buildings on the main campus is 30 years old. In general, buildings are in fair condition. Oakland University maintains a comprehensive list of plant renewal and deferred plant renewal projects, which is updated annually.

Replacement Value of Facilities

The replacement value of Oakland University's 3.78 million square feet, including Meadow Brook Hall is estimated at \$1.1 billion.

Utility Systems Condition

The utility systems in facilities (i.e., heating, ventilation, air conditioning (HVAC), water, sewage, gas and electrical) are in varying degrees of condition, depending on facility age. All are fully functional, with those in the 30 to 40 year age and beyond group needing upgrades to increase efficiency and effectiveness of operation. The storm water system for some of the facilities flooded due to unusual 100-year storms and need attention in coming years. The existing water/sewage infrastructure is adequate to serve the projected programming needs for the next 10 years. An upgrade to the electrical substation was completed in 2003, which included cabling, switchgear, and a new substation. This upgrade will meet projected electrical needs for at least 15 years however capacity of the cabling needs to be evaluated as the campus grows in the future. Additional upgrades to infrastructure throughout campus will be required as campus facilities age and enrollment grows.

Many of the older facilities lack fire suppression systems and would be in consideration to update the facilities per current Codes during major renovation projects.

Due to the age of OU's infrastructure replacement/upgrade is needed for the underground HTHW lines. A new HTHW line needs to be installed to complete the south loop from the new Engineering Center to Varner Hall, IT closets, IT cabling with Voice over IP capabilities, Boiler #4 in the Central Heat Plant, and the infrastructure (HVAC, plumbing and electrical) in the academic buildings (Dodge Hall of Engineering, South Foundation Hall, Hannah Hall of Science, Varner Hall) as well as residence halls (Hamlin Hall and Vandenberg Hall).

Facility Infrastructure Condition

The pavement/sidewalks/structural infrastructure is generally in fair condition. Funds are allocated annually to pavement/sidewalk repair to restore the most deteriorated portions.

Major campus projects included in the next 5-year plan are installation of a Cogeneration system, replacement of old air-handling units, HTHW system upgrade, storm water management, and an upgraded VOIP communication network. A service contract has been in place to maintain new micro-turbines in the new Engineering Center. Oakland budgets \$3.8 million for non-routine maintenance in its current fiscal year from the general fund, endowment distribution, and auxiliary operation reserves.

Land

Oakland University's campus includes 1,443 acres. The main campus is approximately 350 acres. The remaining campus includes several major developments (a faculty/staff subdivision, the National Register Meadow Brook Estate, two golf courses), a large amount of wetland, and significant undeveloped acreage. The Campus Master Plan, approved by the Board of Trustees in April 2001, has identified future uses for all of the undeveloped property.

Buildings Obligated to the State Building Authority

The following buildings/portions of buildings are bonded through State bonds:

Science and Engineering Building – lease expiration in 2034

Elliott Hall – lease expiration in 2040

Pawley Hall – lease expiration in 2042

Engineering Center – lease expiration in 2042

Human Health Building – lease expiration in 2047

The following facilities are bonded through the University:

Golf course - final payment in 2026

Recreation and Athletic Center - final payment in 2026

Student Apartments – final payment in 2031

Electrical Power Upgrade – final payment in 2031

Parking Structure – final payment in 2031

Oakland Center Expansion – final payment in 2031

Human Health Building – final payment in 2039

Engineering Center – final payment in 2042

Oak View Hall - final payment in 2043

Extension of Library Drive – final payment in 2043

Facilities Management Building – final payment in 2043

Oakland University Classroom Utilization Reports Fall 2013 and Winter 2014

106 Classrooms Definitions

ASF = Assignable Square Feet

Capacity= Number of seats or stations in room

WRH = Number of Hours per Week Room was scheduled

WRH% = WRH / Available Hour per Week

Station Occupancy = % of seats used when room was in use.

Report 1 – Fall 2013

- All Day Utilization 8 am to 10 pm

FACILITY CONDITION ASSESSMENT

PLANT RENEWAL, DEFERRED PLANT RENEWAL & PLANT ADAPTATION BACKLOG

The Facilities management computerized Capital Asset Management (CAM) program is a relational database management system, containing over 1,500 projects; totaling over \$214 million. In addition to this summary report, the database is capable of producing ad-hoc reports by priority rank, building system, completed and In-process projects in the current fiscal year, and backlog category.

The objective with this document, in addition to identifying our needs, is to raise awareness of the deferred plant renewal liability, and to serve as a point of departure for broader facilities planning as well as to set priorities. These assessments identified needs, established scope, determined preliminary costs, and prioritized facility projects for the University.

Oakland University completed facility condition assessments in 2006 for 34 campus buildings and updates the assessments of four buildings each year.

Executive Summary of 2014 & 2015 Year Projects

	NET CHANGE FROM PREVIO	US US	YEAR							\$	9.17

See Note 1

Note 1: Projects were eliminated as a result of non-validity and/or duplication.

Remarks: Facility Management continually checks the validity of projects in the database and

eliminates projects that are not viable. The total net change for the project backlog (\$9.17) is

due to the addition of new projects and inflation.

DEFINITIONS

Capital Asset Management is a systematic approach to renewing the University's capital assets through planned:

Plant Renewal

Deferred Plant Renewal

Plant Adaptation

These terms have been formally defined by the National Association of College and University Business Officers (NACUBO) as follows:

Plant Renewal

"...a systematic approach to planning and budgeting for known future cyclical renewal and replacement requirements that extend the (present) life and retain the usable condition of campus facilities and (building) systems ... not normally contained in the annual operating budget. ..." (NACUBO) Cyclical renewals typically exceed five year cycles and include such items as roof replacement, electrical switchgear, and HVAC system replacement. These expenditures keep the physical plant and related infrastructure in reliable operating condition for its present use.

Deferred Plant Renewal

"... encompasses measures that are not carried out because of underfunding in the budgeting process or perceived low priority..." (NACUBO) This includes actual projects, from the prior or current years, not included in the routine maintenance work. These projects represent "Postponed Work" that was deferred because total costs exceed current budget, or projects that are of a "low priority" that present a minimal return on investment. Also included in the Deferred Plant Renewal project list are those projects that were shifted because funds were re-allocated to address emergencies that have no other funding source.

Plant Adaptation

"...improvements are driven by institutional program changes ..." (NACUBO) This involves a programmatic process to plan and fund for projects that will be required due to an evolving use of the institution (e.g., changes in academic disciplines, shifting expectations, supporting institutional mission, etc.), or changing standards (e.g., campus master plans, architectural standards, etc.). These expenditures are over and above normal maintenance, and are not typically contained in the annual operating budget.

FACILITY CONDITION ASSESMENT RANKING

PRIORITY 1 Current Critical (immediate or current year)

Projects in this category require immediate action to:

- Return a facility to normal operation
- Stop accelerated deterioration
- Correct a cited safety hazard
- Any other funded projects require immediate action or construction

PRIORITY 2 Potentially Critical (within one year)

Projects in this category, if not corrected expeditiously, will become critical within a year. Situations in this category include:

- Intermittent interruptions
- Rapid deterioration
- · Potential safety hazard

PRIORITY 3 Necessary – Not Yet Critical (within years two – five)

Projects in this category include conditions requiring prompt attention to preclude predictable deterioration or potential down time and associated higher costs if deferred further.

PRIORITY 4 Recommended (within years six – ten)

Projects in this category include items that represent a sensible improvement to existing conditions. These are not required for the most basic function of a facility; however, Priority 4 projects will either improve overall usability and/or reduce long-term maintenance.

PRIORITY 5 Recommended (beyond year ten)

Projects in this category may not improve overall usability and/or reduce long-term maintenance; however, they provide an economic payback that would not otherwise be present. Projects in this category may represent to upgrade buildings with current codes during major renovation projects. Projects in this category may also represent non-time based improvement, upgrade, or recommendation.

FACILITIES CONDITION NEEDS INDEX (FCNI) Facility Condition Needs Index provides a relative measure for comparing one building (or group of buildings) to another. The index is a simple calculation, derived by dividing the total project costs (for the ten-year window) by the total facility replacement cost (FRC). When applying the index as an evaluation tool, the lower the number, the better the facility condition. It should also be noted that this is an index, not a percentage. It can (and often does in the case of historic facilities) exceed 1.00.

Facility Condition Needs Index

Individual Building	Condition Description
FCNI Range	
0.01- 0.05	Excellent condition, typically new construction
0.06 - 0.15	Good condition, renovations occur on schedule
0.16 - 0.30	Fair condition, in need of normal renovation
0.31 - 0.40	Below average condition, major renovation required
0.41 - 0.59	Poor condition, gut / renovation indicated
0.60 and above	Complete facility replacement indicated

FACILITIES REPLACEMENT COST (FRC) is reported as the total replacement cost for the building or structure and its contents or fixed assets. As an example, the FRC for student housing includes the replacement cost for the building and all the fixtures within each room. Likewise, the FRC for a central heating plant would include the cost of the structure and the boilers, generators and other equipment contained within.

Implementation Plan

State Funding Request

In the future, as additional state projects are considered, Oakland University has need for the following based on program growth, opportunity and State needs:

Oakland University Varner Hall Expansion

The proposed Oakland University Varner Hall Expansion is the University's highest priority capital outlay request and is designed to provide state-of-the-art instructional facilities for rapidly growing academic programs in the Social Science disciplines of Psychology, Political Science/Public Administration, History, Sociology, Anthropology, Social Work, and Criminal Justice, as well as the disciplines of Writing and Rhetoric. Communication/Journalism, and Music, Theater, and Dance. The facility will house classrooms, studios, practice rooms, research and computer labs, and faculty and administrative offices. The project will encompass primarily new construction and will be directly attached to the existing Varner Hall, currently the home for many of these departments. The expanded facility will provide technology enabled, discipline specific teaching studios reflecting advanced design that will accommodate students in dozens of majors offered by the numerous departments in the College of Arts and Sciences. The proposed Varner Hall Expansion will total approximately 258,000 gross square feet of new academic space. This represents a 106% total increase in space for the units involved. Additional space is crucial to address the current severe space shortages as well as to sustain the desired growth in enrollment across the College of Arts and Sciences, which produces 62% of the University's student credit hours. The proposed Varner Hall Expansion is designed to accommodate the growth in size and diversity of academic programs that promote the quality of our educational, scholarly, and community outreach activities. The proposed project will provide a focal point for units in the College of Arts and Sciences that serve the region of Southeast Michigan.

University Funded Priorities

Campus Infrastructure (funded)

All subprojects associated with the infrastructure improvements are complete and operational. They include improvements to the existing high temperature hot water distribution system (completed and operational), the construction of an independent and secure structure that will house information technology hardware (complete and operational), the renovation of O'Dowd Hall's curtain wall system (complete and operational), and the technology and wiring upgrades to O'Dowd Hall (completed and operational).

Further infrastructure improvements include replacement of the plumbing systems in Hamlin Hall South (complete and operational), and Hamlin Hall North (under construction), replacement of the pedestrian bridges in Hill House and Vandenberg Hall (complete and operational), and the North Foundation Hall data center renovation (under construction).

Oakland University William Beaumont Medical School Renovations (funded)

Ongoing improvements for the OUWB students and faculty include expanded office and study space in O'Dowd Hall, administrative, conference and collections room expansion as well as cosmetic improvements in Kresge Library.

<u>Undergraduate Student Housing (funded)</u>

Oak View Hall construction is complete and operational. The project consists of 504 additional beds to support the growing demand for on campus student housing. Expanding housing is in keeping with the campus master plan goal of up to 4,000 residential students.

Parking Structure (funded)

The new parking structure is complete and operational. The project has added 1,245 parking spaces and helps alleviate the increased demand as Oakland University grows.

Elliott Tower (funded)

The Bell Tower (complete and operational) enhances the campus experience by providing a unique, recognizable structure that is visible from locations on campus and off. It provides needed outdoor gathering space for the campus community. The complete cost was donated by Hugh and Nancy Elliott.

North Foundation Admissions Welcome Center (funded)

The Welcome Center project is complete and operational. The renovated space in North Foundation has become the destination hub for student recruitment and retention and serves as the University's front door.

Engineering Center (funded)

Funded by the State and University matching funds as part of the 2012 Capital Outlay, the 128,000 square foot Engineering Center is complete and operational. It provides state-of-the-art instructional, research and development space for the School of Engineering and Computer Science.

Upper Fields Development (funded)

The Recreation and Athletic Complex is complete and operational and provides tennis courts, soccer fields, track, campus recreation fields, grandstand and support structures for Oakland's Athletic and Campus Recreation programs.

Facilities Management Addition (funded)

Construction of the Facilities Management Addition to the Building and Grounds Building is complete and operational. It has consolidated the departments within the Facility Management Organization as well as provided needed space for a more efficient operation.

Campus roads and traffic Management Improvements (funded)

Improvements to existing roads and walks and the construction of a new campus roadway and entrance, along with traffic management enhancements (roundabout, and way-finding) are complete and operational.

Athletic Dome (funded via a public private partnership)

A 110,800 SF air supported dome was completed in December 2014. The structure and support building accommodates sports such as soccer, baseball, softball, football, tennis, golf, track and field, cross country, strength and conditioning and is also suitable for athletic performance training. The project greatly enhances the campus athletic and recreation programs.

Oakland University Golf and Learning Center Banquet Facility (funded)

This 6,000 SF facility supports the event needs of the golf course and provides a venue for University events. The construction is complete and the facility is operational.

Vandenberg Hall Residential Dining Facility Expansion (funded)

An expansion of the existing dining facility is complete and operational. The project serves the University's on campus residents, including the new Oak View Hall residents.

Combined Heating and Power Co-Generation Plant (funded via a public private partnership)

Construction started this past May, 2015. The facility when completed is expected to reduce Oakland's energy costs, improve efficiency and power reliability, reduce CO2 emissions, and provide education opportunities for students.

Future Projects Under Consideration

Oakland Center Expansion – expand the Oakland Center to accommodate additional dining facilities, student study areas, conference rooms, and other needed upgrades.

Elliott Hall Expansion – expand Elliott Hall to accommodate enrollment and program growth.

Residence Hall – a new 750 bed residence hall with dining facilities and classroom space.

Lepley Renovation – renovate the old Lepley pool into a basketball/volleyball practice facility, student athlete support areas, and academic space.

Classroom Learning Technology Center – create new academic space emphasizing technology and collaborative learning.

Anibal House/Fitzgerald House Renovation – convert outdated housing facilities into administrative space to support student success.

Plant Renewal / Deferred Plant Renewal

As previously noted, Plant Renewal and Deferred Plant Renewal projects total \$196 million of the \$214 million Facility Condition Analysis. The current average annual investment into deferred plant renewal and plant renewal is approximately \$2.0 million from General Fund budgets and maintenance endowments; approximately \$3.5 million from Auxiliaries Maintenance Reserves; and \$0.9 million from University Technology Services budgets.
