1. New members welcomed to UCUI. Materials will be online in eSpace prior to meetings for review.

2. CAS New Minor in Astronomy – tabled until further information is received. Questions raised about this proposed minor include:

- Why are the number of credits listed as a minimum of 18 rather than the 18-20 credit range? What does it mean to have a prerequisite listed as “recommended”?
- What is the difference between “recommended” vs. “required” vs. “prerequisite”?
- Are all the credits included in the number of credits required for the minor – for example is Physics I a required prerequisite for the upper level courses? What about calculus? If so, why are these credits not included in the total required for the minor?
- Does PHY 3060 exist? Or is it still in development? If the latter, then minor cannot be 18 credits. Is there a problem with the co-requisite courses? Are they included in the credit tally?
- Can we get a copy of the student survey questions?

3. CAS New Minor in Geology tabled until further information is received Questions raised about this proposed minor include:

- Why are the number of credits listed as a minimum of 18 rather than the 18-20 credit range? What does it mean to have a prerequisite listed as “recommended”?
- What is the difference between “recommended” vs. “required” vs. “prerequisite”? Do student need calculus?
