---------	--------	-----	-----

#### **IMPORTANT NOTES:**

Pre-medical Studies is a concentration, not a major. Students must choose and complete a major, as well as all university and College requirements in order to complete their degree. Any major is acceptable, although most students choose a science-based major such as Biology, as these majors include many of the courses required for the Pre-med concentration.

The pre-medical studies concentration provides the minimum requirements for admission to various medical, osteopathic, dental, optometry and veterinary schools, and provides the necessary background for the science based portion of the standardized aptitude tests: medical (MCAT), dental (DAT), optometry (OAT), and veterinary (VCAT or GRE).

Students are strongly encouraged to meet with the Preprofessional faculty adviser for counseling and assistance in planning their academic programs, to ensure they are staying on track for successful admission to a school of their choice.
